Heavy Duty Fencing Coupler 40mm OD

Product Images

Short Description

Heavy Duty Temporary Fencing Coupler to suit 40mm OD fence frames and posts.

Recommendation: For quick installation, we recommend using an impact wrench with a 16mm socket

Description

Galvanised heavy duty temp fence clamp, suits 40mm OD vertical poles. Perfect to pair with Fortress Fencing temporary fencing panels.

Whether you're installing 10 panels or 1000 temp fence panels, our standard couplers provide a fast and stable connection. Each coupler has a single nut and bolt positioned in the centre of the clamp for ease of use. Available in heavy duty galvanized finish, these couplers are a figure-of-eight shape, allowing for two vertical posts to be coupled in parallel. With 25 per box, you can stock up and buy in bulk to fix your temporary fence securely around your site.

- Available to suit 40mm vertical posts
- Galvanized finish
- Includes nut and bolt in the centre
- Available in lots of 25
- We also stock a heavy duty coupler and security washers, plus application tools. Please get in touch with our friendly team if you require an extra secure coupling system.
