3M E.A.R. Classic Disposable Ear Plugs

Product Images

Short Description

The E-A-R™ Classic™ roll-down earplugs are designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise and loud sound. EAR Classic Earplugs are a disposable foam earplug packed in individual pairs in a polybag, supplied in a box of 200.

Description

EAR Classic provides reduced ear canal pressure by using unique slow-recovery foam. This provides outstanding comfort throughout the day. E.A.R. ear plugs are also sweat and humidity resistant. They provide moisture absorption for consistent fitting, even in humid environments. EAR Classic earplugs are firm when rolled-down for fitting and soften after fitting to fully and comfortably seal the ear canal. The cylindrical shape offers excellent noise reduction.

Features:

- Model Number M18FPP2A2-502C
- Roll-down earplugs
- SLC80 23 dB (Class 4)
- Complies with AS/NZS 1270:2002
- Box of 200
