Machinery Safety Sticker - Danger Rollover 200 x 90mm

Product Images

Short Description

DANGER Roll over machinery safety sticker, 90x200mm. Supplied as a pack of 5

Description

Safety labels are designed to reduce injury, remove risks and control dangerous situations surrounding machinery.Machinery safety stickers help to keep workers safe and minimise the hazards involved with operating large plant and equipment such as excavators, forklifts, backhoes, bulldozers and more. With labels to warn against pinch points, crush hazards, musculoskeletal injuries, and PPE requirements, these stickers cover the range of messages you are likely to need for your equipment.

Under every cover and behind every guard there are moving parts. These moving parts on heavy machinery can cause harm with little effort. Safety Labels warn and highlight the danger and risks involved in these situations. Safety labelling crush zones, pinch points and the dangers surrounding equipment is critical.

This Machinery safety sticker is ideal for equipment with a roll hazard. It features the text 'DANGER rollover of this machine can cause serious injury or death'. Sticker measures 90 mm x 200 mm.

Features:

- DANGER rollover of this machine can cause serious injury or death
- 90 mm x 200 mm
- Pack of 5
- Quality long lasting print
