Plasterboard Trolley

Product Images

Short Description

Steel plasterboard trolley ideal for plywood, MDF, plasterboard, Gyprock, wallboard, and other panels, sheets, boards and sheeting materials. Measures 1250mm long x 550mm wide x 1200mm high, SWL 1350kg.

Description

This strong plasterboard trolley is constructed from steel tube making it robust and durable. With high quality welding for longevity on site, this site trolley includes heavy duty 8" rubber wheels to allow for easy manoeuvrability. Ideal for transporting plasterboard, panels, boards and sheeting material around worksites or warehouses, it is rated to 1350kg SWL.

Using a plasterboard trolley reduces the risk of physical strain for workers whilst at the same time speeding up the movement of large and awkward panels and sheets on site. This strong steel trolley is industrial quality and easy to use - featuring a 1250mm long x 550mm wide deck it can support over 1300kg of plasterboard.

The rounded corners help to prevent damage to finishes on site, as well as preventing damage to panels. Supplied complete with a support rail or handle to assist with steering and also to lean the boards against for greater stability.

Features:

- Great for plywood, MDF, plasterboard, Gyprock, wallboard, and other panels, sheets, boards and sheeting materials
- Size: 1.25m (L) x 0.55m (W) x 1.2m (H)
- Packaged size: 1.25m (L) x 0.61m (W) x 0.2m (H)
- Tubular steel frame
- SWL1350kgs (base)
- The handle can only support 100kgs of the weight for the span of the trolley (1.25m).
- 8 Inch heavy-duty rubber wheels
