## CellGrip™ Anchor Pin

CellGrip is designed to secure and enhance geocell performance in slope reinforcement and soil retention applications. Available with plastic or metal head.

## TL-P1 Anchor Pin

The TL-P1 holds all types of erosion control and soil stabilisation blanket matting securely in place. The high load anchoring pin is designed to hold all types of turf reinforcement matting, erosion blankets, geotextiles and landscaping fabrics.

## U Pins

Essential for pinning a variety of erosion control products and occasionally geotextile to the ground.

It is recommended that a minimum 150mm U Pin is used for relatively firm compacted soils and the longer 300mm U Pin is used for pinning through loose topsoil.
