

# Martins Natural Gypsum, 20Kg Bag

## Product Images

## Short Description

---

20 kg bag of Martins Natural Gypsum. Gypsum will improve soil structure, increase water penetration and increase aeration which will enhance root development. Use to break up clay, can be used for light and heavy clay applications.

## Description

---

Martins Natural Gypsum is a clay breaker that improves water penetration and retention. Gypsum will improve soil structure, increase water penetration and increase aeration which will enhance root development. Natural Gypsum will improve the soil structure of heavy clay soils.

This 20kg bag of Grade 1 Natural Gypsum solves problems such as poor drainage, soggy soil and soil compaction. It provides essential plant nutrients including calcium and sulphur, as well as improving the physical condition and drainage of hard clay soils. Gypsum encourages root development and improves the ability of air and water to penetrate the soil.

### Features:

- Solves problems such as poor drainage, soggy soil and soil compaction
- Provides essential plant nutrients - Calcium and Sulphur
- Improves the physical condition and drainage of hard clay soils
- Increases root development
- Improves the ability of air and water to penetrate the soil
- Improves soil structure
- Soil Conditioner
- Low in moisture
- Lasts for years
- Organic, 100% Natural
- Calcium (CA) - 20.6%
- Sulphur (S) - 15.3%
- Grade 1 natural Gypsum

### Precautions for safe handling and storage:

- Avoid contact with eyes and skin
- Avoid breathing dust
- Wash thoroughly immediately after handling
- Wash work clothes regularly
- Store in a cool, dry well ventilated location, isolated from diazomethane, aluminium and phosphorus
- Keep containers sealed against exposure to air and water. Long term storage may result in caking
- Store away from foodstuffs
