

Corflute Sheet, 2440 x 1220 x 2.5mm, White

Product Images

Short Description

Corflute Sheet, 2440 mm x 1220 mm x 2.5 mm, White

Description

Corflute, corrugated plastic or corriboard - sometimes referred to under the trade names of Polyflute, Coroplast, FlutePlast, IntePro, Proplex, Correx, Twinplast and Corriflute - is an extruded twin wall plastic sheet made from high-impact polypropylene. It is a lightweight and tough material, and is resistant to many oils, solvents and water. This makes it an ideal multi purpose protector on site.

Commonly used for protecting new flooring, windows, concrete and paint work, Corflute sheet is available as 2.4 x 1.2 metre sheets with a 2.5 mm thickness. It can easily be cut with a utility knife, folded around structures for protection and laid between layers for protecting delicate panels.

Corflute sheet is commonly used for temporary signage too, and Jaybro prints a multitude of standard and custom signs on Corflute. It is light, cheap, strong and versatile!

- Sheet measures 2440mm x 1220mm
- 2.5 mm thick
- Blank white Corflute
- Pallet Qty: 500 sheets

Additional Information

CODE	03-2412CF
U.O.M	Each
Package Quantity	500
Width	1220 mm
Length	2440 mm
