

Tarpaulin, 7.3 x 4.8m, Silver/Black

Product Images

Short Description

7.3 x 4.8m heavy duty tarp made from reinforced polyethylene, with reinforced corners for extra strength and durability.

Description

Heavy Duty Tarpaulins made from 14 x 14 weave (205gsm). Reinforced polyethylene, with rope in hem and reinforced corners for extra strength and durability. Eyelets in each corner enable easy tie down to cover your load or ute tray, ensuring materials are protected from rain and wind. The thick 205 gsm polyethylene is tear and rip resistant for long term use. It is mildew, UV and water resistant and measures 7300 mm x 4800 mm. The silver finish helps reflect heat and the black side absorbs heat. Use this tarp for covering your trailer or building, as a cargo cover, temporary awning, or for preventing water ingress in small structures.

To extend the life of your tarp, ensure you lift it up and over the load rather than dragging it across sharp

objects to remove it. Avoid dropping sharp objects onto the tarp, and ensure it is dry before folding up for storage.

Features:

- Tarp measures 7.3 x 4.8 m
- 14 x 14 weave
- 205gsm polyethylene
- Rope hem for extra strength
- Reinforced stitched corners with eyelets

Additional Information

CODE	44-4873T
U.O.M	Each
Weight	6
Material	Polyethylene
Width	4.8 m
Length	7.3 m
