

Bubble Wrap, 100 x 1.5m Roll x 10mm

Product Images

Short Description

Bubble Wrap 10mm - 1.5m x 100 m roll, protects all types of surfaces from damage.

Description

100 metre bubblewrap rolls are a great way to protect all kinds of sensitive items on site. Whether you are working around fragile structures or want to protect items like handrails, corners, edges balustrades, sharp edges etc, bubble wrap is the ideal solution. Bubble wrapping is soft and protective and commonly used in warehousing, transport and shipping as well as in the building trades.

Use multiple layers to provide extra shock isolation for transporting fragile items, or use a single layer in between sheets to protect surfaces. Buy bubble wrap as well as a wide range of building protection supplies at Jaybro.
