

Jaybro Plan Trolley, Size A0

Product Images

Short Description

Plan Trolley, Size A0, 1350 x 760 x 620mm. [Clamps sold separately.](#)

Description

The Jaybro Plan Trolley measures 1350 x 760 x 620 mm and holds A0 size plans neatly and securely. It offers an easy way to store many A0 sized documents without taking up valuable space in the site office or on the job.

Filing and organising plans ensures they are kept clean, neat and in good condition. Hanging plans vertically protects them from creases and folds which over time can make small dimensions and notes difficult to read as the paper or print shows signs of wear.

Your plans will be easy to access via the front loading clip system. The trolley has capacity for 20 plan clamps and features heavy duty castors so it can easily be wheeled around the office or site as necessary, even when fully loaded.

Each clamp holds up to 100 sheets, and the trolley is made from black powdercoated tubular steel with industrial strength castors.
