

Chevron Fluoro 750 x 900 mm, Ribbed

Product Images

Short Description

Chevron marker in fluoro yellow and black, measures 750 x 900 mm.

Description

Class1 reflective Fluoro chevron marker, designed and manufactured to meet Australian Standards. These ribbed fluoro chevron alignment markers are used to alert approaching motorists of a change in the direction of travel or of the presence of an obstruction or obstacle. Road and Traffic hazard markers are intended use in a permanent traffic management scenarios. Commonly used to highlight pedestrian islands, median strips, traffic separator and roundabouts. The presence of hazard markers helps direct traffic in these scenarios.
