

Temporary Fence Feet - Poly Blok 43mm Hole

Product Images

Short Description

Temporary Fence Feet Poly Blok 43mm hole, Black, Size: 800mm (H) x 284mm (W) x 146mm (H) 40mm OD Verticals & Horizontals, Weight: 17kg, Hole size: 40mm diameter.

Description

The Poly Blok is a strong temp fence foot produced from recycled rubber and plastic. A sturdy and reliable base for temp fencing installations, it is Australian Standards approved and useful in any temporary fencing situation.

The Poly Blok is the favoured fencing base throughout the construction, demolition and civil industries, recognised for its light weight and stable construction, as well as its ability to be installed quickly and easily.

Weighing in at 17kgs, about half the weight of a standard concrete base, Poly Blok temp fence feet are effect at reducing worker fatigue and the chance of injury when installing large runs of temporary fencing. Available with mounting holes to suit 43mm OD fence frames, these temp fencing feet have dual mounting positions which can reduce trip hazards by mounting the fencing panel at the front of the base.

As a leading supplier of perimeter fencing solutions in Australia, we are able to guarantee that we have stock on hand and ready to ship.
