

# Vehicle Gate For Temporary Fencing

## Product Images

## Short Description

---

Vehicle gate panel only - 40mm OD 2.5m x 2.1m

## Description

---

An effective way to keep an area secure whilst remaining functional for vehicular traffic. Gates are connected via a coupler that is designed to work as a hinge, giving you the freedom to add a gate at any point in your fence. This purpose-designed vehicle gate can fit anywhere within your fencing line to give a 4.9m opening. This gate can also be used as a fence panel in applications where room is limited.

- 2.5 metre long panels
- Vehicle gate weighs 20kg
- Note that gates must be used with a hinge and wheel set
- Galvanized finish
- Lightweight and easy to install
- Made with SMARTWELD for superior strength
- Galvanised 72 Micron
