

# SILTmasta SF2000 - Economy Sediment / Silt Fence

## Product Images

## Short Description

---

SILTMasta economy sediment silt fence measuring 770mm x 100m. Economy SF2000 silt fence is a polypropylene filter fabric that can be installed as an entrenched vertical barrier fence and is designed to intercept and detain runoff, trapping harmful silt through settlement and filtration before it leaves the site. The material consists of polypropylene tape yarn, ideal for short term applications.

- Woven silt stop. Green UV resistant
- Roll Height: 770mm
- Roll Length: 100m
- Weight: approximately 6.9kg per roll
- Pallet Qty: 23 rolls

## Description

---

SILTMasta Sedi Fence is designed for protection of natural surrounding areas during the course of earthworks and construction activities for a variety of civil engineering and domestic projects. Sensitive aquatic margins require protection from sediment run-off which can contaminate water-bodies due to nutrient overload.

SILTMasta SediFence is used to prevent such contamination by flanking exposed soils or bordering entire construction sites.

Economy 30-SF2000 silt fence is an economical filter fabric that can be installed as an entrenched barrier fence, and is designed to intercept and detain runoff, trapping harmful silt through settlement and filtration before it leaves the site.

- Roll Width 770mm
- Roll Length 100m

Did you know that soil erosion, sediment and litter from construction sites can be major sources of storm water pollution and can cause significant harm to the environment. Anyone on a building site who does not comply with sediment control regulations can be prosecuted or issued with on-the-spot fines.
