Product Images

Short Description

Ethically sourced hardwood timber stake, recommended for use when installing EcoLog® to the soil or

ground. These Timber installation pegs are available in two lengths 450mm and 600mm

Description

Ecolog® Coir Log Installation Stakes - 50x25x450mm

Hardwood timber stakes are the wooden pegs used for securing Coir Logs during installation. Coir Logs are commonly deployed on slopes & embankments to control soil erosion and manage water run-off.

If you are using Ecolog® Coir Log for your next project, make sure to speak to talk to our friendly team about the benefits of using uPolyfabric’s hardwood stakes.

Polyfabric’s hardwood timber stakes are used for numerous applications on civil work sites, from the installation of coir logs to setting up silt fence and marking out work sites.

Applications:

- Coir Log Installation
- Silt Fence Installation
- Site Setup
