Short Description

JAY-CURE A - Acrylic Polymer/Water Based - 200L

Description

Jay-Cure A water based acrylic curing compound is a Class D, Type 1 curing compound for use on new concrete that facilitates maximum moisture retention through the curing period to maximise concrete strength & durability. Jay-Cure A is certified to comply with Australian Standard AS 3799.

- Reduces the likelihood of surface cracking or dusting
- Easy to use, eliminates messy water curing or polythene film
- Complies with Green Star Office Design V3 IEQ-13
- Low odour, no ventilation requirement
- No stringent safety requirements
