Product Images

Short Description

Carbon dioxide fire extinguisher, 5kg. CO2 is used on Class B (flammable liquids) and is safe to use on live electrical fires, all Fire extinguishers come with a tag ready for installation.**FIRE EXTINGUISHERS COME WITH TAG READY FOR INSTALLATION AND ARE CERTIFIED TO AS/NZS 1841**

Description

CO2 is a clean and effective firefighting medium that does not leave a residue. Safe for electrical fires, this CO2 dry chemical extinguisher is made from a strong yet lightweight body, powder-coated for corrosion resistance. CO2 is used on Class B (flammable liquids) and is safe to use on live electrical fires. All fire extinguishers come with tag ready for installation. Featuring a steel cylinder and rugged dispensing trigger, this CO2 fire extinguisher is designed to perform when and where you need it.

Using a fire extinguisher on the wrong class of fire can cause the fire to spread. Make sure the extinguisher matches the hazards in the area it will be installed. CO2 fire extinguishers can be identified by a black strip around the top of the cylinder. They are used for electrical fires, and they work by discharging carbon dioxide and choking the fire.

Suitable for:

- Class B fires (flammable liquids)
- Electrically energised equipment

Features:

- Complete with bracket
- 5kg size
