

Masterpac Pump & Drive Unit

Product Images

Short Description

The Masterpac Pump Kit combines a powerful petrol drive unit with a versatile submersible pump and concrete vibrator, offering a reliable and efficient solution for excavation, construction, and other applications.

With features such as a Honda GX160 engine, quick action coupling, and compatibility with various tools, this kit provides hassle-free operation and longer service life.

Description

The Masterpac Pump Kit offers a comprehensive solution for various applications, including excavation pits, construction sites, dams, trenches, pier holes, and swimming pools. This kit combines the powerful Masterpac petrol drive unit, featuring a reliable Honda GX160 4-stroke motor, with a versatile range of compatible submersible pumps and concrete vibrators.

Key Features:

- **Honda GX160 Petrol Engine:** hassle-free operation of the Honda GX160 motor ensures reliable performance and consistent power output.
- **3-Tooth Drive Coupling:** kit includes a 3-tooth drive coupling, enabling quick and easy connection to a wide range of flexible shaft submersible pumps and concrete vibrators.
- **Compatibility:** kit is compatible with most submersible pumps and concrete vibrators, providing flexibility and convenience for various applications.
- **Longer Service Life:** designed for durability, the components of the Masterpac Pump Kit ensure a longer service life, reducing maintenance and replacement costs.
- **Quick Change Vibrator Coupling:** the quick change vibrator coupling facilitates easy operation, allowing for swift transitions between tasks.

The Masterpac submersible pump, included in the kit, features a 6-meter shaft for extended reach and versatility. It is equipped with a convenient camlock hose fitting, enabling tool-free and quick connection. The 3-tooth drive coupling ensures reliable power transmission, enhancing efficiency during pumping operations.

Experience the reliability and convenience of the Masterpac Pump Kit, designed to meet the demands of excavation, construction, and other challenging applications.
