

J-Guard Side Mount Post

Product Images

Short Description

J-Guard Side Mount Post: Versatile edge protection with easy installation. Achieve safety and compliance at exposed edges on-site.

Description

FEATURES

- Completely modular and flexible to suit your individual needs
- Quick and easy installation – does not require a certified installer
- Provides a 940mm high protective barrier at single row, and 1880mm high at double row around the perimeter of the site
- Heavy duty galvanized steel components withstand harsh weather
- Compact packaging for streamlined freight and delivery to site
- Easy to dismantle for re-use on the next project

APPROVALS

- Tested and Approved to AS/NZS 4994—Temporary Edge Protection.

APPLICATIONS

- Concrete slab and formwork edges
- At the edges of pits and excavations
- Multi deck and high rise construction edges
- Edges of mezzanine floors and landings
- Around openings in floors or roof structures
- Along walkways, stairways or ramps
- Areas where floor heights differ significantly
- Additional protection when working at height
