Short Description

Mearin Plus F200 200mm GRP shallow channel 100mm deep C/W SS heelguard grate (HM3/5) Class B, 304SS, CLIPFIX

Description

The Mearin Plus shallow channel is a lightweight, durable, and easy-to-install drainage channel that is ideal for use in areas with limited ground clearance. It is made of GRP (glass-reinforced plastic), which is resistant to chemicals, salt, and oils. The stainless steel heelguard Class B anti-slip grate provides a high level of safety, while the Clipfix system makes it easy to install and remove the grate. Features • Shallow depth for area's where construction clearance is limited • Made from lightweight and durable GRP material • Stainless steel heelguard Class B anti-slip grate • Versatile for a variety of applications • Excellent value for money Benefits • Easy to install and maintain • Strong and durable • Eco-friendly • Corrosion resistant channel • Excellent value for money Applications • Pool drains • Big box retail • Walkways • Driveways • Train Stations • Other Areas where construction clearance is limited
