Short Description

Mea Access S2000 200mm SS Edge Shallow Polymer Channel 200mm total depth C/W SS heelguard grate (HM3/5) Class B, 304SS, CLIPFIX

Description

The MEA Access Stainless Steel Edge with 304SS Heelguard Anti-Slip Grate is a high-quality drainage channel that is ideal for a wide range of applications. It is made of durable stainless steel, which is resistant to corrosion and wear. The channel also features a 304SS heelguard anti-slip grate, which provides excellent safety and traction, even in wet conditions. Features: • Durable Polymer concrete channel with stainless steel edge rail • 304SS heelguard anti-slip grate for safety and traction • Available in a variety of widths and depths to suit different needs • Easy to install and maintain Benefits: • Corrosion-resistant • Wear-resistant • Safe and reliable • Long lifespan • Low maintenance Applications: • Threshold drainage • Driveways • Commercial and industrial areas • Streetscape projects • Landscaping projects

Additional Information

CODE	ACP-712840K4
U.O.M	Each
Material	Polymer Concrete
Channel Depth	200mm
Channel Width	200mm
Range	Access
Channel Length	1000mm
Grate Safety	Heelguard
Load Rating	CLASS B
Locking Type	Clipfix
Grate Material	Stainless Steel
Channel Meterial	Polymer Concrete
Swatch	no_selection
