Short Description

Mea Fluid 150 Glass Reinforced Plastic Inline Sump

Description

The Mea Fluid 150 Reinforced Plastic Inline Sump is a durable and easy-to-install sump for the Mea Fluid 150 Reinforced Plastic Drainage Channel. It is made of high-quality glassfibre reinforced polyester (GRP), which is known for its strength, durability, and resistance to chemicals and weathering. The sump is designed to collect and discharge water from the drainage channel. It has a large capacity and a built-in leaf trap to prevent debris from entering the sump. The sump is also easy to clean and maintain, with a removable grate (sold separately) and a sludge outlet.

Additional Information
