

Round Fixed In Ground Steel Bollard - 1700 mm x 140 mm

Product Images

Short Description

Permanent Fixed Bollard 1700 mm x 140 mm - In Ground

Description

Heavy duty steel bollards are commonly used in front of shops, warehouses, ATMs and on-site areas where extra protection from accidental vehicle impacts is required. They can be used to delineate safe pedestrian walkways, provide protection along driveways, and help prevent ramming at the workplace. Featuring highly visible yellow powdercoat and a reflective red strip, they are a highly noticeable safety measure.

Jaybro supplies a wide range of fixed and temporary steel bollards for roads, traffic and on-site use, including surface mount steel bollards, removable inground bollards, plastic t-top bollards and plastic cone-shaped mighty bollards.

- Heavy duty asset protection bollard
- Manufactured from heavy wall steel tube with welded starter bar
- Red reflective strip on top
- 140mm diameter x 1700mm high
- Also available in 114mm diameter x 1380mm high
