

Plastic Chalk Line Reel - 30m

Product Images

Short Description

30m Chalk Line Reel

A chalk line is used for marking long, straight lines on moderately flat surfaces. The chalk line allows you to mark out lines much farther than possible by hand or with a straight edge.

Description

30m Chalk line reel with a unique spool release button on the handle allows for rapid release of the chalk line. A strong and fine braided chalk line holds the powder exceptionally well.

- Plastic body
- 30m line
