
Width Marker Right Class 1 Aluminium 450 x 900 mm

Product Images

Short Description

Class 1 Width Marker Right Aluminium, measures 450 x 900 mm

Description

This Class 1 retroreflective right width marker features a bold black and white striped design. Hazard width markers are typically used to signpost a change in width of the road, or to warn of an upcoming obstruction such as the edges of a bridge. They are a permanent sign used for highlighting median strips, islands and similar hazards.

This sign is constructed from aluminium and measures 405 x 900 mm in a long rectangular configuration. It is made from Class 1 retroreflective material.
