Short Description

Water truck machinery safety stickers, including danger and warning labels that relate to heavy vehicle and machinery.

Description

Water Truck safety labels, designed to reduce injury, remove risks and control dangerous situations surrounding heavy vehicles.

Firstly, you need to be aware that under every cover and behind every guard there are moving parts. Moving parts on heavy vehicles and machinery can cause harm with little effort.

Safety Labels warn and highlight the danger and risks involved in these situations.

Safety labelling crush zones, pinch points and the dangers surrounding heavy machinery is very important.

This set of safety labels include danger labels for actions that could result in a fatality and warning labels for actions that can cause serious injury.

For more information relating to safety labels and stickers, contact Jaybro via phone or email.
