

# 700mm Orange Traffic Cone QLD TMR Compliant

## Product Images

## Short Description

---

Orange 700 mm high traffic cone / witches hat with 250 mm reflective collar. Queensland Department of Transport and Main Roads complaint.

## Description

---

Traffic cones, commonly referred to as witches hats play an important role in traffic management. Deployed to control, direct or divert vehicle and foot traffic. This highly visible orange traffic cone with 250 mm wide Class 1 Reflective Collar. A heavy rubber base prevents the cone from tipping over. At 700mm tall this cone creates a highly visible traffic delineation. The retro reflective tape adds extra visibility in low light situations.

Traffic cones, otherwise known as witches hats, channelizing devices or construction cones, are a great way to mark out hazards at your site, workplace, along a road or in a public area. Commonly used during road works to temporarily redirect traffic in a safe manner, traffic cones can prompt motorists to merge lanes or avoid temporary hazards.

**Features:**

- Class 1 Reflective
- QLD TMR Complaint
- 250mm wide reflective band
- 700 mm high
- Blaze orange for excellent visibility
- Heavyweight base for stability
