

mastaTEX™ Non-Woven Class C, 6m x 150m

Product Images

Short Description

mastaTEX™ non-woven Class C, 6m x 150m roll with PET Filament for subgrade/subsoil separation, slope stabilisation and liner protection

Description

mastaTEX non-woven is a continuous filament geotextile made from highly durable virgin polyester fibres, which are resistant to all naturally occurring soil acids and alkalis. The textile is formed through needle punching in order to produce a product suitable for use in road & rail work, separation, drainage, protection and filtration works.

mastaTEX non-woven geotextiles are manufactured to ISO 9001 quality assurance procedures. Properties of mastaTEX non-woven geotextiles are derived from in house and independent laboratory testing.

Applications:

- Pavement Stabilisation
- Subgrade/Subsoil Separation
- Slope Stabilisation
- Liner protection

Additional Information

CODE	PF34-6-150
U.O.M	Each
Weight	250
Brand	GEOmasta
Length	150 m
Width	6 m
Type	Grade C
