

Premium Two Way Radio With Accessory Pack

Product Images

Short Description

The powerful waterproof UHF radio features a backlit LCD display, 80 UHF channels, 5 Watt maximum power and a long life lithium ion battery. An auto battery save feature enables this unit to hold charge for up to 24 hours operating time.

Description

Commercial grade, heavy duty two way radio offering outstanding performance in challenging conditions.

Built tough for Australian and New Zealand conditions, this 2-way radio is waterproof up to 1 metre for 30 minutes, meaning it can perform in the most intense environments. Packed with a multitude of accessories, this is an ideal kit for the building site, for traffic management communication and other long range site communication.

With 4 different audio level settings (normal, bass, mid range and high) to provide a natural voice enhancer for sharp clarity and performance. The benefit of the smart key feature allows you toggle between Voice Enhancer, Instant Channel or Call Tone Feature to tailor to your needs.

The powerful waterproof UHF radio features a backlit LCD display, 80 UHF channels, 5 Watt maximum power and a long life lithium ion battery. An auto battery save feature enables this unit to hold charge for up to 24 hours operating time. Plus, this two way radio operates up to 17km in line-of-sight range so you can be sure to stay in touch on the job.
