Description

Complete mask and filter kit for dusts including asbestos. Packed in a practical 'lunch box', this asbestos kit, also known as a silica kit, can be issued to staff working in demolition or other hazardous applications where asbestos is a risk. The Sundstrom SR100 silicone half face respirator in this asbestos kit is designed for heavy-duty work during extended periods.

The Sundström SR100 half face respirator is a silicone face mask with a deep chin cup and broad nose rim for comfort. Two exhalation valves with valve caps feature air diffusion resulting in no clogging. This kit also contains a P3 filter, pre filter, filter covers and more. P3 filters can be used against all types of wet and dry particles, such as dust, smoke, aerosols, spray, asbestos, bacteria, viruses and mould. The filter fits snugly into the Sundström half mask.

Suitable for:

- P3 Protection
- Asbestos, dusts, smoke, aerosols, sprays, bacteria, viruses and mould

Kit Contains:

- Sundstrom SR100 respirator
- P3 particle filter
- Pre-filters
- Filter cover
- Cleaning tissue
- Instruction manual
- ID tag with barcode
