

Duram Virotuff Anti Slip Polyurethane Coating Yellow 4L

Product Images

Short Description

Anti Slip Polyurethane Coating Yellow 4L. Single pack, polyurethane flexible coating ideal for concrete, timber, fibreglass, etched metal and much more. This anti-slip coating is hard wearing, chemical resistant and quick curing. 4 litre can covers approximately 3 to 4 square metres.

Description

Duram Virotoff is a water based, environmentally friendly, durable, single pack, liquid applied, urethane / polymer, UV resistant anti-slip protective coating.

Virotoff incorporates special composite 'non-sharp' aggregates to provide good traction against slips and falls, whilst also providing a pleasant underfoot feel even with bare feet. Virotoff provides a tough, abrasion resistant, semi-flexible trafficable coating in an attractive textured finish, all in one can.

Virotoff is a slip resistant floor protective coating for foot and vehicular traffic, available in a range of colours. Virotoff has very low VOCs and meets the 'Green Star' environmental criteria. Virotoff has been formulated for application to indoor and outdoor areas where an anti-slip coating is required.

Ideal for:

- Building and construction: anti-slip flooring, trafficable walkways, plant rooms, steps, stairs, safety zones, decks, balconies, patios, equipment platforms
- Industrial areas: safety work areas, factory & warehouse floors, work platforms and storerooms
- Marine: boat decks, trailers, pontoons and marinas
- Agriculture and farming: agriculture equipment, cherry picker platforms
- Automotive and rail: load areas of utes, trucks, vans, buses and stone damage protection for caravans and other vehicles
- Domestic and recreational areas: decks, balconies, patios, garages, steps, stairs, entertaining areas, pool surrounds and driveways
- Schools, parks and public areas: playgrounds, demountable classrooms, walkways, toilets and washrooms
- Hospitality applications: kitchen areas, bar areas and storerooms

Suitable surfaces:

Virotoff is suitable for most properly prepared and primed and generally porous substrates including porous concrete, cement render, cementitious levelling compounds, brick, block work, masonry, timber including plywood and particle board, FC and CFC sheeting, porous tiles (excluding vitrified, non-porous and glazed tiles), metal etch primed metal, soundly painted surfaces and fibreglass.

Apply test areas to all surfaces and in particular doubtful surfaces.

Yield:

4 litre can covers approximately 3 to 4 square metres.

Additional Information

CODE	67-ASPCAY
U.O.M	Each
Weight	4
Colour	Yellow
Suits Substrate	Brick, Cement, Concrete, Fibreglass, Masonry, Metals, Particleboard, Timber
Brand	Duram
Size	4 L
