

4" (100mm) Galvanised Male Bauer To Flange

Product Images

Short Description

Provides a quick and easy connection between a 4" (100mm) Male Bauer To Flange. Galvanised finish.

Description

4" (100mm) Galvanised Male Bauer To Flange. Bauer fittings are quick and easy way to join two lengths of hose together. They are commonly used for fluid transfer in construction, road maintenance and tankers. Bauer couplings include a range of male and female hose tails, BSP fittings, adaptors, strainers, reducers, end caps and other joins. Jaybro's Bauer fittings come in a galvanized finish for strength and durability. With precision machined components, the bauer range is ideal for many types of hose joins.
