

8" (200mm) Galvinised Travis Fitting Set

Product Images

Short Description

8" Galvanised Travis Fitting Set comprises male and female spigots, fitting clamp and seals

Description

This 8" (200mm) Galvanised Travis Fitting Set comprises male and female spigots, fitting clamp and seals.

Travis couplers are the industry leader in the vacuum hose and irrigation sectors where long service life with quick and easy assembly is vital. Rolled from heavy gauge tensile steel and galvanized, they enable rapid connection and disconnection of fittings on suction and delivery hoses.

The Win United hose and fittings range from Jaybro is a comprehensive range of industrial hoses for water, oil, fuel, chemicals, slurry, waste and all sorts of industrial fluids. Jaybro carries layflat, helix and regular hoses most of which can be purchased by the metre and fitted in house by our knowledgeable team, with the desired fittings. These include Bauer, Travis, camlocks and all sorts of fittings, couplings, strainers and hose tails. Get in touch with our team for further information.

Kit Contains:

- Galvanised male spigot
- Galvanized female spigot
- Fitting clamp
- Seals
