

# 0-1m Flood Depth Marker Sign, QLD

## Product Images

## Short Description

---

Queensland 0-1m Flood Depth Marker Blade, Measures 200mm x 1850mm high. Meets QLD TMR requirements for G9-22-1 flood depth signs.

## Description

---

1m Queensland Depth Marker blade for installing near flood prone areas. This flood sign shows incremental depth measurements up to 1 metre so that motorists can accurately judge the level of floodwaters. Typically installed near causeways, bridges and river crossings, this flood marker complies with QLD TMR Standard Drawing 1170.

This sign is installed by setting the 0 mark at the lowest pavement level on the section of road prone to flooding. Usually installed as a set, this sign works with others that show progressively higher increments where flood depths are in excess of 5 metres. Boxed style, measures 200mm wide x 1850mm tall. D1.

**Features:**

- Sign measures 200mm wide x 1850mm tall
- Incremental markings from 0 to 1 metre
- Ideal for causeways, bridges and river crossings
- Meets QLD TMR requirements for G9-22-1 flood depth signs - complies with QLD TMR Standard Drawing 1170
- Flat style
