

Flood Depth Marker 0-2m, C1 Reflective

Product Images

Short Description

0-2m Flood Depth Marker Blade, measures 200mm x 2350mm high. Meets road authority requirements for flood depth signs.

Description

Depth Marker blade sign for installing near flood prone areas, 0-2m. This flood sign shows incremental depth measurements up to 2 metres so that motorists can accurately judge the level of floodwaters. Typically installed near causeways, bridges and river crossings, this flood marker complies with standard road authority requirements, and is made from C1 Reflective sheeting.

This sign is installed by setting the 0 mark at the lowest pavement level on the section of road prone to flooding. Usually installed as a set, this sign works with others that show progressively higher increments where flood depths are in excess of 5 metres. Measures 200mm wide x 2350mm tall.

Features:

- Measures 200mm wide x 2350mm tall
- Incremental markings from 0 to 2 metres
- Ideal for causeways, bridges and river crossings
- Made from C1 Reflective sheeting
