

0-2m Flood Depth Marker Sign, 3250mm

Product Images

Short Description

Flood Depth Marker Sign with increments up to 2 metres to accurately show the level of flood waters. Sign measures 3250mm tall.

Description

2m depth marker blade for installing near flood prone areas. This flood sign shows incremental depth measurements up to 2 metre so that motorists can accurately judge the level of floodwaters. Typically installed near causeways, bridges and river crossings, this flood marker complies with road authority requirements. This sign is installed by setting the 0 mark at the lowest pavement level on the section of road prone to flooding.

Usually installed as a set, this sign works with others that show progressively higher increments where flood depths are in excess of 5 metres. Boxed style, measures 3250mm tall.

Features:

- Sign measures 3250mm tall
- Incremental markings from 0 to 2 metres
- Ideal for causeways, bridges and river crossings
- Boxed style
