**EVENT IN PROGRESS**

## Short Description

---

Event In Progress - Class 1 reflective event series (WA) multi-message sign. Measuring 1200 x 300mm and manufactured from 5 mm Corflute. For use Western Australia (WA) only. Jaybro stocks over 9000 road signs at all time, ensuring we have the signs you need in stock.

## Description

---

Event In Progress Class 1 reflective MMS Event Series signage, 1200 x 300mm Corflute temporary sign for use in WA.

Used to control, direct and guide motorists during temporary road works in.

Designed to catch the attention of passing traffic and reduce the risk of accidents and injury.

## Quality Signage

Jaybro delivers quality, durable products. Investing in one today ensures you get a temporary road sign that will last for a long time, for use time and time again.

## What are MMS Signs?

Multi-message signage is a substitute to single message stand-alone road warning signage. A multi-message sign system is able to display three signs within a single stand. Ideal for traffic management during temporary roadworks.

Jaybro's produces multi-message signage in a 5 mm Corflute range. The lightweight nature of Corflute and its flexible characteristics makes it ideal for temporary signage.

## Why is Event Traffic Signage Needed?

Western Australia's road provides many opportunities for organisations and community groups to host events using roads for the benefit of the general public. These events need to be managed in a way that ensures the safety of motorists and pedestrians. The goal is to minimise the disruptions to the normal road usage. Events that do not occur on roads may still have a large impact on the road Network. Every event has an impact on the safety and efficiency of the surrounding road and traffic and this needs to be taken into account when planning an event.

## Temporary Traffic Diversion Signage

Western Australia has strict regulatory guidelines for MMS-DIV multi-message signs. Jaybro provides signs that meet Australian standard for designs and usage.

Multi-message sign frames hold 2 x 600 x 600mm signs along the top, with a single 1200 x 300mm sign along the bottom.

The 600 x 600mm panels is changeable for a single 1200 x 600mm sign along the top with the single 1200 x 300mm sign panel along the bottom.

## Can't find what you are looking for?
