

strabaTEX Road Repair Tape

Product Images

Short Description

Self-adhesive road tape available in widths of 166mm up to 500mm, in 20 metre rolls. Ideal for pavement joint sealing, basement waterproofing, concrete crack treatment. strabaTEX Road Tape is a non-woven

polyester geotextile which is laminated onto a bitumen compound polymer. It is resistant to high temperatures allowing hot asphalt to be laid directly onto the product.

Description

strabaTEX Road Tape is a non-woven polyester geotextile which is laminated onto a bitumen compound polymer. It is resistant to high temperatures allowing hot asphalt to be laid directly onto the product. strabaTEX Road Tape has exceptional adhesion to bitumen and concrete.

Its flexibility along with its self adhesive composite membrane, high tensile strength as well it's puncture and heat resistance define it as the best solution in treating road and bridges. It is used to treat cracking in road pavements and can also be used to seal concrete culvert joints.

Applications:

- Pavement joint sealing
- Basement waterproofing
- Concrete crack treatment
