
Reflective Kerb Ramp 100mm High End Cap

Product Images

Short Description

End Cap - 300 x 300 x 100mm. Sold individually enabling you to customise your ramp to your needs.

Description

Reflective Kerb Ramp 100 mm high end cap section. Kerb ramps grant safe access for vehicles and wheeled devices over road side kerbs. Recommended for use on civil and construction work sites.

Manufactured from durable recycled rubber materials. Effective on and around work sites for providing

passageway for trolleys and wheelbarrows.

Reduce trip hazards by installing where foot traffic is heavy during road works.

Jaybro's range of rubber kerb ramps are highly visible, further reducing trip hazards. The hi-vis nature of our ramps ensures vehicle operators can identify them on the kerb side.

The design of the ramp ensure vehicles and other devices can engage the ramp from any angle - without damage. The rounded edges and minimal incline shape allows for easy access.

Sold in modular section with separate ends allows for installation of longer sections. Able to be installed with an offset from the gutter, allowing for a water / drainage channel.
