

40 Ahead 600 x 600mm, Class 1 Reflective Corflute Sign

Product Images

Short Description

Suitable for South Australian roads this 40 Ahead Class 1 sign measures 600 x 600mm and is made from Corflute. It is designed to be used with a MMS sign frame.

Description

This sign warns of 40km speed limit ahead, featuring 40 in a black circle. It is a Class 1 speed sign, measuring 600 x 600mm. Specifically manufactured by Jaybro to comply with South Australian road authority specifications, this MMS or multi-message sign can be combined with other signs in a MMS sign frame to

present a customised message for your project. Multi-message signs are designed for use on SA roads during civil roadworks, road maintenance and for surrounding construction sites during excavation or building. Multi-message signage is often used for traffic controlling and management on temporary roadwork sites.

Corflute is a low cost alternative to steel and is ideal for temporary applications. Manufactured with a 7 year weather resistant coating and comes standard with rounded corners, it is a lightweight yet strong sign material. Jaybro prints on Corflute at our in-house printing facility, ensuring fast turnaround and a high quality product, produced locally so we can ship to you, fast!
