

Handrail To Suit 3000 Series Fence Panel

Product Images

Short Description

2540mm x 400mm Handrail attachment to suit the Fortress Fencing 3000 Series Panel. This product is designed to improve worker and pedestrian safety in and around construction and work sites. Hand rail for temporary fencing. This handrail suits 2.55m x 2.1m fence panel. Works with Fortress Fencing 3000 Series and 5000 Series temp fencing systems. Easily installed on fence panels via heavy duty couplers, these handrails feature a galvanised finish and are approved to Australian Standards AS4687.

Description

Reduce the likelihood of trips and falls with a purpose built handrail, manufactured to fit all Fortress Fencing temp fence variants. Handrails can be useful in situations where ground is particularly uneven on the pedestrian facing side. Fortress Fencing temp fence hand rails are made from high quality steel and feature a galvanized finish.

Install this handrail to a temporary fence to provide extra pedestrian protection against trips on fence feet. They are particularly useful when pedestrians and the public are moving close to the outer edge of a temporary fence, and the fence feet jut out into the walkway. Each rail requires 2 or 4 couplers to attached to a 3000 or 5000 Series temporary fence panel. Approved to Australian standard AS/NZS4687. Hand rail size is 2540mm x 400mm.

Features:

- Suits Fortress 3000 or 5000 Series fence panels
- Hand rail weighs just 4.5kg
- Measures 2540mm long x 400mm high
- Each handrail requires 4 x standard or heavy duty couplers (sold separately)
- Galvanised
- Easy to install
- Provides extra pedestrian protection
- Approved to Australian Standard AS4687
