

GLASS GRIPPER GLOVE

Product Images

Short Description

Glass gripper gloves with yellow latex palm, one size fits all.

Description

Glass gripper gloves, easily identifiable by the yellow latex rubber on the palms of the gloves. The latex rippled palm adds exceptional grip to the palm of the glove and makes them ideal for handling glass, ceramics and other hand to handle items. The back of the gloves is not covered with Latex, the open back allows for better ventilation.

These gloves offer maximum comfort and sweat absorption to the user and are ideal in industrial environments, the thick knitted wrist to ensures the gloves remain debris free. Commonly found in industries including glass, tiles & ceramics, warehousing, abattoirs, fisheries, general purpose handling.

To learn more about how to choose the right gloves and find out more about the different types of hand protection standards, check out our article on [hand protection and Australian Standards](#).
