Product Images

Short Description

UVEX Silv-Air C P2 Respirator with exhalation valve. Features a comfortable exhalation valve and comfort sealing lip around the nose. Packed individually for convenience, supplied in a box of 15. Certified to AS/NZS 1716, this single use disposable mask is ideal for applications such as masonry, stone setting, bricklaying, ground covering and tiling.

Description

The UVEX silv-Air C is a folding dust mask with a continuous headband and integrated sealing lips to make it easy to fit these masks correctly – and to wear them comfortably for long periods. Certified to AS/NZS 1716, this single use disposable mask is ideal for applications such as masonry, stone setting, bricklaying, ground covering and tiling.

Suitable for:

- P2 protection
- Dusts

Features:

- Seamless headband
- Concealed flexible and adjustable nose clip
- Comfortable sealing lip in nose area for improved fit
- Exhalation valve to reduce exhalation resistance and to reduce heat and moisture inside the mask
- Individually packaged, box of 15
