

# Compressed Cardboard Corner Protectors

## Product Images

## Short Description

Compressed 4mm thick cardboard corner guard, angled 60 x 60 x 1000 mm

## Description

Ideal for protecting packaging goods against potential surface damage and strapping cuts, these compressed cardboard corner protectors or angle board are great for protecting pallets. Use to increase the stability of pallet loads particularly of soft materials or easily damaged packs, such as bags of concrete. Reinforce your pallets with these cost-effective cardboard protection strips and minimise shipping costs by maximising the load per pallet. Corner protectors can be used to help stabilise and contain loads that are irregular, soft or that do not nest or stack neatly. Made from 4mm thick tough cardboard, these corner protection angles measure 60 x 60 x 1000 mm long.
