Product Images

Short Description

Metal sign holder designed to suit 250 x 250 mm hazchem and dangerous goods placards

Description

250 x 250 mm metal sign holder frame to suit HAZCHEM and other metal diamonds. Designed to quickly and easily display dangerous goods / Hazchem placards.

Dangerous goods including chemicals and fluids must be marked and labelled while being transported or stored in a facility.

Hazchem placards help emergency services when responding to fires and chemical spills at workplaces using, storing or handling hazardous goods.

Hazchem placards are an easy way to alert emergency services and persons presence of hazardous chemicals and provides information about them.

What are Dangerous goods?

Dangerous goods are liquids, gases and solids that can potentially harm people, property or the environment.

Business using, storing, transporting and handling hazardous goods in tanks or large quantities are required to display placards under the WH&S Regulation.
