## **Jaybro Sign Materials Information**

### **Metal Signs (CODE 01)**

Durable 0.6 mm thick steel signage. A durable sign designed for indoor and out door use. A 7 year weather resistant coating will resist rusting and fading. Pre-drilled mounting holes for easy installation on walls and fences. Standard with rounded corners.

### **Poly Signs (CODE 02)**

Flexible 1.6 mm thick polypropylene. A weather resistant option that is highly recommended for outdoor use. UV stable, resisting fading and cracking for up to 5 years.

Polypropylene is recyclable and made from 70% recycled materials. Standard with mounting holes for quick and easy installation. Comes with rounded corners.

### **Corflute Signs (CODE 03)**

3 mm fluted core plastic. A low cost alternative to metal or poly signs. A recommended solution for temporary signage applications both indoors and out.

Use caution when installing Corflute signs with some glues and construction adhesive, damage can occur.

### **Self Adhesive Vinyl (code 04)**

A Heavy duty, permanent Adhesive vinyl, suitable for indoor and outdoor applications. Simply peel the backing paper off to apply to any clean, smooth surface.

### **Safety Sign Supplier**

Jaybro is a leading manufacture of safety signs including danger, warning, mandatory and more. Browse online or call us for the signage to suit your exact needs. As a manufacture, we can custom make signs to suit your needs in the above materials.
