

V Lock Post Socket With Wedge Kit

Product Images

Short Description

Durable V lock and wedge post mounting socket, measuring 275mm, durable galvanised finish ensuring maximum use of both the socket and wedge. Wedge pulling tool and additional wedges are available for purchase separately.

Description

V lock and wedge sign post locking system for installing and anchoring posts. Extremely quick and easy to install. Simply install the V lock anchor, insert the sign post and drive the wedge into the anchor, locking the post in place.

The wedge can be removed easily with the specialised wedge pulling tool, which is available for purchase separately. Removed wedges are reusable.

The V lock socket mounts flush to ground, and is ideal for mounting in concrete. It is fully galvanised, ensuring the socket and wedge have a long life span. The V lock socket is 275mm long, which provides a stable and sturdy fixture point.

- Galvanised steel construction
- 275 mm long
- Used for installing a 60mm OD (50mm nominal bore) signpost into new concrete surfaces
- Ideal for areas where posts are likely to need replacing
