

Repeater Sign - Loose Stones - 5mm Class 1 Reflective

Product Images

Short Description

Class 1 Reflective sign with highly recognisable black car pictogram scattering loose stones and causing damage. This Loose Stones sign is constructed from 5 mm Corflute in safety yellow, measuring 900 mm x 600mm.

Description

This Class 1 Reflective sign indicates Loose Stones with an easily recognisable black car diagram on high contrast safety yellow. Available in 900 mm x 600mm plastic Corflute, this sign is perfect for road works and traffic applications where new road surfaces, loose gravel, loose asphalt or other rough hazards pose a risk to traffic.

A more sturdy sign such as a boxed edge metal sign can be placed at the start point of the hazard, and where the loose surface continues for some time, repeater signs such as this Corflute Loose Stones sign are ideal to reiterate the message to traffic. Made from 5 mm thick plastic Corflute with Class 1 Reflective finish, this pictogram sign offers good visibility throughout the day or night and helps to minimise damage caused by traffic travelling at speed during roadworks and construction.

Ideally used in a series, this repeater sign offers maximum safety over rough surfaces. Jaybro carries a wide range of safety, construction, directional and traffic signs and we have over 9000 road signs in stock at all times. This sign is also available as a free-standing metal swing stand sign, in 900 mm x 600mm or 1200 mm x 900 mm sizes, with a yellow powder coated steel tube stand.

Complementary messages such as Traffic Hazard Ahead, Loose Surface and Rough Surface are also available. Need a custom message sign? Jaybro is a leader in custom printed Class 1 Reflective signage that complies with day and night visibility requirements. Contact our customer service team for more information on custom printed signs.
