

NSW Guard Rail Reflector - Yellow Double Sided

Product Images

Short Description

NSW guard rail reflector, yellow double-sided delineator.

Description

Delineators are small retro-reflectors or panels of retro-reflective material which are attached to guide posts, guard fence, bridge end posts, or similar supports and concrete safety barriers, to provide a coherent pattern of delineation of the edges of the carriageway as an aid to night driving.

NSW guardrail reflector with a 90 degree aluminium bracket. These delineators are double sided with yellow on both sides. Space between bracket feet is 25mm. Fix to guardrails by screwing down, screws not included.
