

Stick And Stomp Pavement Marker - Yellow

Product Images

Short Description

Yellow stick and stomp pavement markers are ideal for temporary marking of lanes at the side or shoulder of the road. Also available in white and red & white, for centre lane marking.

Description

Yellow stick and stomp pavement marker, also available in white and red & white. Stick 'n' Stomps are temporary raised pavement markers flaps with a rip-easy clear cover. These pavement markers feature Class 1A Reflective material on both sides for excellent visibility. Measuring 100 mm long x 50 mm high x 25 mm

wide, they are an essential product for new road construction, asphaltting, road resurfacing, road works and more. This two way temporary raised pavement marker provides immediate and economical delineation for both day and night visibility. Stick and stomps are also convenient as they provide an easily identifiable guide for line markings during resealing. An easy to remove clear cover protects the reflective film during sealing, and is easily ripped off afterwards.

- Dimensions 100 mm long x 50 mm high x 25 mm wide
- Class 1A Reflective
- Double sided
- Rip off clear cover to protect whilst sealing
- Also available in all white, and red and white
